

WHEN ACCURACY COUNTS...
COUNT ON SPARTANICS

WORLD LEADER IN
CARD COUNTING

600 SERIES CARD COUNTER

Spartanics[®]

600 SERIES CARD COUNTERS

Spartanics 600 Series Card Counters, the well-known gold standard of automated card counting, now come in models geared for diverse types of cards and methods of card manufacturing.

Model 612

The 612 is for secure counts of cards in cartridges from any major manufacturer.

Model 620, Model 625, Model 670

The 620 is for counting cards without shrink film packaging, while the 625 is for cards in shrink film packaging. The 670 is for clear or opaque cards alike.

Model 640, Model 650

The above models count according to card thicknesses. Use either the adjustable pitch 640 (for 0.25 mm-1.65 mm) or the 650 for the thinnest cards (0.13 mm- 0.56 mm).

Model 632

You can even count rounded edge material such as pharmaceutical inserts with the 632.

Preset for the count you need to both eliminate the possibilities of count tampering and to let the duo of visual and audio alarms keep even the busiest operators alerted to errors.

- 600s are the world's only counting systems that double scans actual cards twice, instead of card images, delivering 100% accuracy each and every time.
- 600s are built with the reliable proprietary electro-optical technology and modular design used in all Spartanics products.
- 600s (except for the 612) are controlled by an easy-to-use multilingual user interface that requires no special operator training.
- 600s work with any brand of card punching equipment.
- 600s come with a loaner policy that minimizes downtime.

If you want an accurate card count in seconds, you want a Spartanics 600 Series Card Counter. Whether you manufacture cards or issue cards, if your business involves credit cards, bank cards, smart cards, pre-paid phone cards, ID cards, gift cards, RF cards, access control cards, loyalty cards, or other plastic cards, the Spartanics 600 Series Card Counters are your tools to track inventory every step of the way.

Model	Application	Metric	Inches
<i>Permanent Setting Security Counters:</i>			
620	High value cards	0.61mm-0.86mm	0.024"-0.034"
625	High value, white core cards, count through shrink film packaging	0.61mm-0.86mm	0.024"-0.034"
670	High value, opaque cards and clear cards	0.61mm-0.86mm	0.024"-0.034"
<i>Adjustable Counters:</i>			
640	Adjustable pitch	0.25mm-1.65mm	0.010"-0.065"
650	Thin cards	0.13mm-0.56mm	0.005"-0.022"
<i>Variable Material Counters:</i>			
632	Rounded edge material such as inserts/outserts	1.02mm-6.10mm	0.040"-0.240"
632E	Envelopes	1.02mm-5.08mm	0.040"-0.200"
<i>Secure Counts in Cartridges:</i>			
612	CR 80 Cards in Cartridges	0.61mm-0.86mm	0.024"-0.034"

Other specifications for 600 Series Counters except the 612:

Physical dimensions: 711mm (28") W x 279mm (11") H x 292mm (11.5") D

Shipping dimensions: 864mm (34") W x 432mm (17") H x 457mm (18") D

Stack Tray: 450mm (18") Long **Power Supply:** 100-240VAC, 50/60Hz

Weight: 15Kg (33 pounds) **Shipping Weight:** 19Kg (42 pounds)

Supplied Accessories: Power Cord & Instruction Manual

Accessories by request: Foot switch and Dust cover

Other specifications for the 612:

Physical dimensions: 330mm (13")W x 840mm (33")H x 230MM (9") D

Shipping dimensions: 965mm (38")W x 279mm (11")H x 508MM (20") D

Weight: 20Kg (45 pounds) **Shipping Weight:** 21Kg (47 pounds)

Cartridge Sizes: Utilizes fixed focus. Can be preset for varying dimensions of cartridges. Cartridge size needs to be specified when ordering.

Power Requirements: USA 120 VAC, 2 amp 50/60 cycles, single phase.

Export models configured to receive country's electrical requirements.

40 years of Proven Experience

Since 1963, Spartanics has specialized in engineering, manufacturing and marketing automated equipment, using sophisticated electro-optical cell technology to increase accuracy, efficiency and security in counting flat stock and in processing and control of decorated sheet and coil materials.
