MALAHIDE BY SPARTANICS E4-PC PAPER CARD PRESS

The Malahide by Spartanics E4 - PC Paper Card Machine is designed to hot stamp thin paper and plastic cards less than 0.020" thick. The E4 - PC is commonly used to hot stamp playing cards, phone cards, place cards and trading cards with foil stamped graphics, holograms, signature panels, sequential numbers and scratch-off patches. Fast, accurate and quiet, the Malahide by Spartanics E4 - PC Paper Card Machine runs up to 6,000 cards per hour.

Weight	550 lbs. Crated 450 lbs. Uncrated
Control Panel	Power - Start - Stop - Jog - Speed - Temp - Counter - Reverse

EFFICIENCY

Malahide by Spartanics Presses are all electric power efficient machines.

SIMPLICITY

Designed for ease of use. Operator training is minimal.

DEPENDABILITY

Our Hot Stamping Presses are durable and mechanically designed for real world applications.

POPULAR UPGRADE OPTIONS

▶ HOLOGRAPHIC FOIL FEED

The E4-PC can register stamps to the selected material through the use of a registration sensor and stepper motor.

▶ SEQUENTIAL NUMBERING

When equipped with the sequential numbering head, the E4-PC has the ability to stamp progressive numbers such as: 1001, 1002, 1003, 1004...
