MALAHIDE BY SPARTANICS E4-CC PLASTIC CARD PRESS

The Malahide by Spartanics E4 - CC Plastic Card Machine was designed to hot stamp CR-80 plastic cards over 0.02" thick. Running at speeds of up to 6,000 impressions per hour, the E4-CC is able to apply dazzling foil stamped graphics, security holograms, signature strips, sequential numbers and scratch-off patches onto plastic cards. Fast, accurate and quiet, the E4-CC delivers quality results from a compact efficient design.

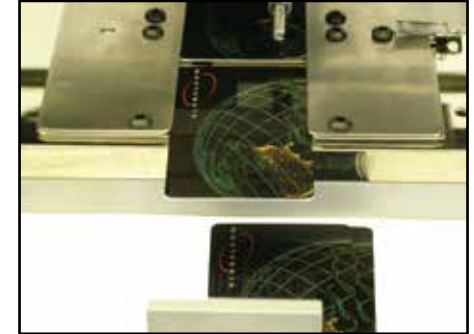

SYSTEM CONFIGURATIONS

Print Area	3" x 3.5"
Print Tonnage	8 Tons Nominal
Card Dimensions	ISO / CR-80 0.02" ~ 0.03" Thick
Foil Pull	Side to Side 0.75" ~ 3" Draw
Discharge	Incremental Conveyor or Re-Stack
Speed Range	1,500 ~ 6,000/Hour
Machine Size	2' Deep x 3' Wide x 4' High
Electrical	115 VAC @ 13 Amps 220 VAC @ 7 Amps
Weight	550 lbs. Crated 450 lbs. Uncrated
Control Panel	Power - Start - Stop - Jog - Speed - Temp - Counter - Reverse

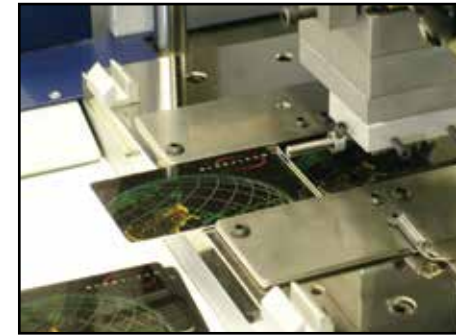

EFFICIENCY

Malahide by Spartanics Presses are all electric power efficient machines.

SIMPLICITY

Designed for ease of use. Operator training is minimal.

DEPENDABILITY

Our Hot Stamping Presses are durable and mechanically designed for real world applications.

POPULAR UPGRADE OPTIONS

▶ HOLOGRAPHIC FOIL FEED

The E4-CC can register stamps to the selected material through the use of a registration sensor and stepper motor.

▶ SEQUENTIAL NUMBERING

When equipped with the sequential numbering head, the E4-CC has the ability to stamp progressive numbers such as: 1001, 1002, 1003, 1004...
